**Benefits of MyHealthStory™ for healthcare providers, facilities and practice managers:**

- MyHealthStory is FREE to patients and healthcare facilities' staff, and is only \$25/prescribing provider/month in ambulatory settings
- MyHealthStory is secure and private. Health insurance and pharmaceutical companies do not have access to your records through MyHealthStory
- MyHealthStory helps satisfy select Stage 1 and 2 Meaningful Use criteria, including Stage 2 patient engagement criteria
- MyHealthStory is a single community-wide platform view of the patients medical history
- MyHealthStory provides a full audit trail for patients and providers in one place
- MyHealthStory is interoperable with over 40 EHR and Practice Management systems

MyHealthStory allows you to keep all health records in one place—and download, print and share them as needed. All of the benefits listed in this brochure, however, may not be available to you if your healthcare provider has not yet enrolled in MyHealthStory. If you would like all the benefits MyHealthStory offers, contact us and we will invite your healthcare provider to participate. Call 904.318.5803.

MyHealthStory is brought to you and servicemarked by CommunityHealth IT, a nonprofit entity designed to improve the health of our local communities through "activated" health information exchange (HIE)—the sharing of health information securely and efficiently. For more information about MyHealthStory please call 904.318.5803 or visit [www.CommunityHealthIT.org](http://www.CommunityHealthIT.org).

MyHealthStory

Where you and your  
healthcare providers  
can connect.

### For patients

MyHealthStory gives you free round-the-clock access to your healthcare history and puts you in control. Save time by making appointments and renewing prescriptions online. Share information with your healthcare providers to ensure better communication and reduce the risk of medical errors. Gain access

to important information such as your lab test results and medications. With MyHealthStory you can be sure that you and your providers are informed about YOUR health story. Sign up today at [www.CommunityHealthIT.org](http://www.CommunityHealthIT.org).

### For healthcare providers

MyHealthStory allows you access to patients' medical information 24 hours a day, reducing the risk of medical errors due to lack of information. It also makes it easy to connect with other medical providers in the community as well as clinicians, labs and health plans.

MyHealthStory gives you the tools you need to run your practice smoothly and efficiently, making the delivery of healthcare more convenient for you and your patients. Learn more about MyHealthStory at [www.CommunityHealthIT.org](http://www.CommunityHealthIT.org).

MyHealthStory is an online personal health record that your healthcare providers and you share to keep you well and manage your health conditions.

Private

#### Through MyHealthStory,™ you can:

- Access your personal health data at any time from any computer with an Internet connection
- Consult with your doctor about specific health symptoms
- Request prescription refills
- Make appointments
- Manage the healthcare of your family from one account (great for keeping track of adult parents and kids!)
- Store all of your healthcare information in one place, including family health history and immunization records
- Receive lab or test results
- Review your account details and make payments
- Allow healthcare providers to access your records as needed

MyHealthStory is a great Connector! It places important medical information about my patients in the middle of the necessary workflow of my staff, consulting providers and myself—and amazes my patients. We're all connected in one place, securely and efficiently.

— David C. Willis, MD  
Ocala, Florida

#### Through MyHealthStory,™ you and your staff can:

- Access patients' medical information 24/7
- Make and receive referrals
- Respond to patients' billing, appointment and referral requests
- Perform online doctor visits
- Request and receive patient lab or test results
- Improve communication among peers and with patients
- Increase safety by reducing the risk of medical errors and improving care
